

# Discover the new generation of the M-710 robot series

## M-710*i*D/50M\*

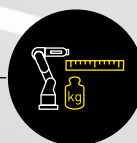

**FULLY COVERED  
STRUCTURE**

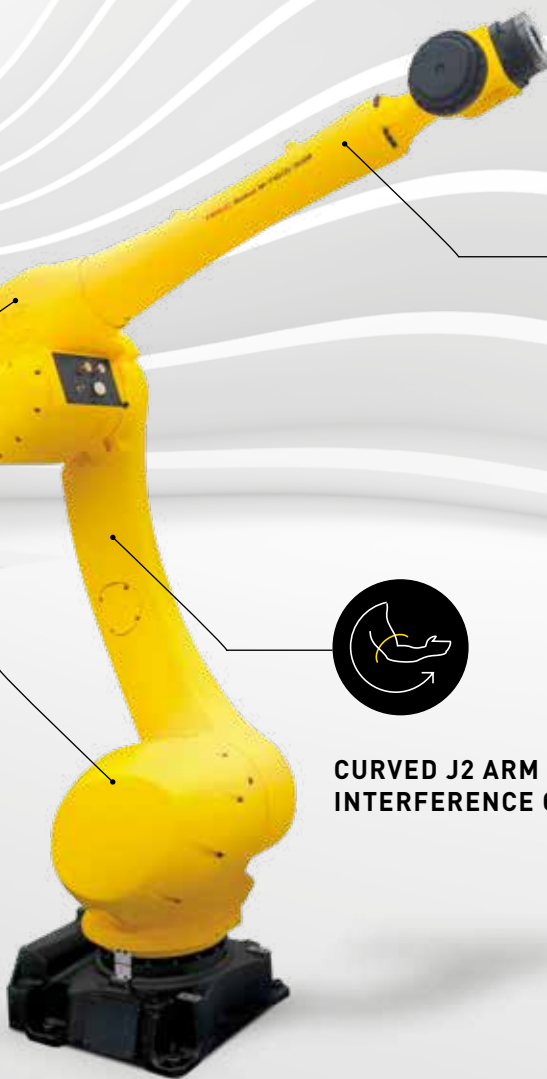

**INCREASED PAYLOAD  
AND SPEED**

**CURVED J2 ARM TO REDUCE  
INTERFERENCE CONTOURS**

**PAYLOAD: 50 KG  
REACH: 2606 MM**

**Coming soon**

\* Successor of M-710iC/45M

### The new *i*D generation

- Redesign with increased efficiency results in a curved J2 arm
- Optimised weight/payload ratio while maintaining the well-proven basic M-710 design
- Curved J2 swing minimises the interference, reducing the risk of collisions with surrounding obstacles
- Increased payload and load capacity as a clear added value with improved cost efficiency
- The fully enclosed design makes it resistant to water and dust, protecting all sensitive components (such as reducers, cables, etc.)
